OPERATING IT
STEPS

STEP

1

Locate the Sound System and turn it ON

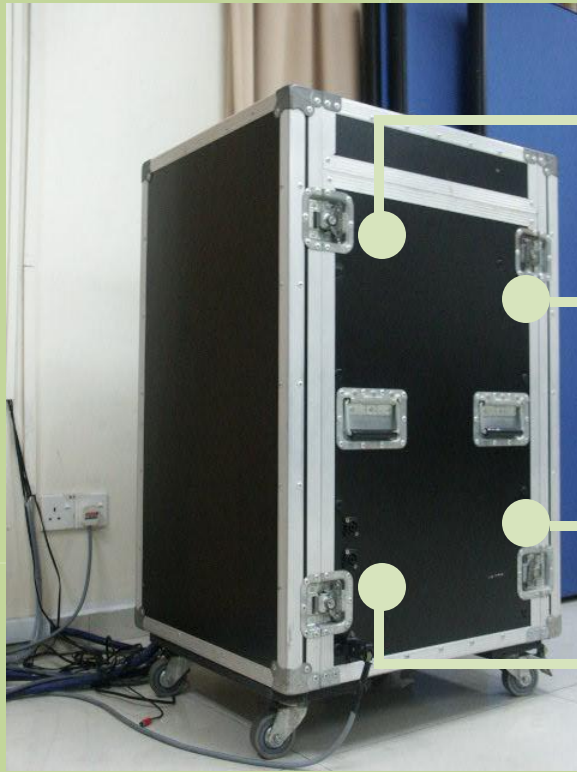

The switch is located on the wall behind the sound system.
Turn it ON to power up the sound system.

STEP 2

Unlock and remove the covers of the Sound System

Unlock the four locks indicated and remove the covers to access the sound system.

STEP 2

Unlock the four locks indicated and remove the covers to access the sound system.

STEP 3

Locate the two switches on the Sound System and turn ON

Switch 1 is at the base of the sound system. **Switch 2** is at the back of the mixer/amplifier.

STEP 4

Adjust the levels on the Mixer to the level indicated.

The pictures above shows the ideal levels the mixers are to be set. Refer to the pictures above for guidance.

STEP 5

Locate and Ensure that the microphone(s) cords are Plugged-in

Ensure that the right microphone cords are plugged in the right sockets.

STEP 6

Switch ON and test the microphone and/or other equipment.

MIC TEST

SOUND CHECK

Test the microphone by checking if sound is coming out from the TWO speakers. Also, ensure that there is no audio feedback (buzzing/hissing sound).
